

AFEF AHMED JARIF

Software QA Engineer | QA Automation | API Testing | Performance Testing

Dhaka, Bangladesh | Open to Remote QA Automation / SDET Opportunities | afeefahmedprof93@gmail.com | +8801556741566

[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software QA Engineer with professional QA experience from 2023 to present, covering manual and automation testing for web, and mobile applications. Skilled in Playwright, TypeScript, Selenium WebDriver, Java, API testing, Postman, k6, and CI/CD workflows. Experienced in building scalable automation frameworks, validating APIs, executing performance tests, designing test cases, and supporting stable and reliable production releases in Agile/Scrum environments.

TECHNICAL SKILLS

Testing & QA: Manual testing, functional testing, regression testing, smoke testing, sanity testing, exploratory testing, cross-browser testing, mobile testing, STLC, SDLC, test planning, test case design, test execution

Automation: Playwright + TypeScript, Selenium + Java, TestNG, Page Object Model (POM), reusable utilities, fixtures, parallel execution, retry handling, Allure reports, HTML reports, Cypress familiarity, Appium familiarity

API, Backend & Data: Postman, REST API testing, request/response validation, status code validation, payload checks, schema checks, business logic validation, integration testing, SQL-based data validation

Performance, CI/CD & Tools: k6, load testing, smoke/load/stress scenarios, response-time analysis, throughput checks, Git, GitHub, Sourcetree, GitHub Actions CI/CD, Jira, Asana, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software QA Engineer | Enosis Solutions | 2025 - Present | Dhaka, Bangladesh

- Lead manual, automated, API, and performance testing activities for web and mobile applications in Agile/Scrum teams.
- Design and maintain Playwright with TypeScript end-to-end test suites using reusable fixtures, utilities, and scalable test architecture to improve regression efficiency and automation coverage.
- Plan and execute k6 performance tests to evaluate response time, throughput, stability, and system behavior under expected and high-load conditions.
- Perform API testing using Postman and validated REST API behavior, backend data, business rules, integrations, and error handling.
- Review requirements, define test coverage, create test scenarios, and support sprint planning, reviews, retrospectives, and release readiness activities.
- Document defects with clear reproduction steps, expected and actual results, evidence, severity, and priority, then coordinate with developers through resolution.

Software QA Engineer | Enosis Solutions | 2023 - 2025 | Dhaka, Bangladesh

- Conducted comprehensive manual testing for web, desktop, and mobile applications throughout the Software Testing Life Cycle (STLC).
- Developed and executed Selenium WebDriver automation scripts using Java and TestNG, improving regression testing efficiency and increasing automation coverage for critical workflows.
- Executed functional, regression, smoke, sanity, and cross-browser testing before production releases to reduce release risk and improve product quality.
- Maintained automation code and test assets using Git, GitHub, and Sourcetree for version control, branching, review, and collaboration.

RELEVANT QA AUTOMATION PROJECTS

Playwright UI Automation Lab | [GitHub Project](#) | TypeScript / Playwright

- Built an end-to-end Playwright automation framework with Page Object Model structure, reusable fixtures/utilities, parallel execution, reporting, and GitHub Actions CI/CD integration for scalable and maintainable test execution.

Playwright API Automation Framework | [GitHub Project](#) | TypeScript / Playwright

- Built a scalable REST API automation framework using Playwright and TypeScript with reusable API clients, schema validation, authentication workflows, negative testing, reporting, and CI/CD integration.

Selenium UI Automation Framework | [GitHub Project](#) | Java / Selenium / TestNG

- Created a Selenium WebDriver framework using Java, TestNG, and Page Object Model for browser-based UI automation, regression testing, and reusable test components.

k6 BlazeDemo Load Testing Framework | [GitHub Project](#) | JavaScript / k6

- Developed a modular k6 performance testing framework with smoke, load, and stress scenarios, custom metrics, data-driven execution, thresholds, and HTML reporting.

Appium TypeScript Mobile Automation Framework | [GitHub Project](#) | TypeScript / Appium

- Developed a mobile automation framework using Appium and TypeScript with reusable components, platform-specific configurations, scalable test structure, and automated mobile testing workflows.

EDUCATION

B.Sc. in Computer Science and Engineering | Islamic University of Technology (IUT) - OIC | 2019 - 2023 | CGPA: 3.5 / 4.0
